

MONGOLIAN DAIRY LIVESTOCK

Mongolia is a land of milk and...more milk!

Archaeological evidence confirms that Mongolians have been nomadic dairy herders for more than **5,000 years**, and today they milk more livestock species than any other country on earth.

SEVEN DIFFERENT LIVESTOCK SPECIES ARE MILKED TODAY IN MONGOLIA: YAKS, CATTLE, BACTRIAN CAMELS, HORSES, SHEEP, GOATS, AND REINDEER.

EACH ANIMAL IS ADAPTED TO A DIFFERENT REGION, AND IN NORTHERN MONGOLIA, YAK MILK PRODUCTS ARE A LOCAL DELICACY. GIVE THEM A TRY!

YAKS

CATTLE

CAMELS

HORSES
